

Anonymized Data for Analytics

The company needs data from multiple systems for Data Analytics and Data Science.

The data must be transformed and anonymized, and made available as soon as possible and in compliance with GDPR. When the results are available, they need to be sent to the source system.

Why use Adoki?

Complex scenarios

- Simple demand processes
- Handled by end users

Priority loads

- Every workload is marked with a level of priority; critical jobs need to be finished as soon as possible.

Simple transformations

- Data can be transformed and anonymized even during replication.

Scheduler

- Jobs can be scheduled.

REST API

- Users are notified when new data are ready to be loaded.
